FW Pearlescent Inks can be used to add shimmer and shine to decorative arts such as greeting cards, seasonal decorations, mounts and frames.

They are perfect to create dazzling effect where highly decorative elements are required to illuminate different forms, and can be used on various surfaces as well as conventional surfaces. These intermixable acrylic-based inks are water-soluble when wet, but dry to a water-resistant film on most surfaces\*. All colours are very to extremely lightfast.

Because of the large particle size of pearlescent pigments, they will not go through fine line nozzles for airbrushes, nor will they be suitable for technical pens, fountain pens and paint markers\*. The best means of applying pearlescent colours is by using a dipper pen, ruling pen or brush.
